

Bottle it up

Definitely don't throw away glass juice bottles – just wash off the label, sterilise the bottles and use them to serve individual portions of milk to your guests.

Sweet seating

Play with old elements by incorporating them into your home in unusual ways. We love what Katie from Recreate has done with this old suitcase – it's now a comfortable and rather elegant chair and bound to be a talking point in any home.

Say my name

If you don't want your kids to mark their territory with colourful and riotous displays of keep out signs and posters on the door to their bedroom, compromise by subtly labeling their room with elegant wooden initials fixed to the wall.

Grow your own curtains

Instead of fussy and expensive curtains, decorate your kitchen or dining room window with Eucalyptus branches for a wonderful organic touch – and they smell divine. >>
